Assembly

Chair parts. Including

- a. Chair (1)
- b. Cup holder (1)
- c. Happy bag (1)
- d. Foot rest (1)
- e. Hardware pack

The chair is already put together. All you have to do is find the perfect place to hang it.

Eye lag Installation

Locate ceiling joist (by Stud Finder or tapping and verifying with a small nail.) Be sure to locate exact center. Using a 3/16" (3mm) wood drill bit, drill a hole (approx. 4" (10CM) deep) perpendicular to the ceiling. Screw in the one supplied eye lags until all threads have disappeared into the joist. Do not loosen or adjust once in place.

Important: Holes must be directly in the center of the studs for maximum weight bearing capacity. Failure to do so could cause eye lags to loosen.

Hang the EZ HANG CLASSIC by the O ring onto the pre-installed eye lag using the S hook. Hang the footrest from the same point as the chair. Store chair in carrying case when not in use.

Washing Instructions: Scrub gently with a soft brush and a mixture of water and soap. Using a fabric protector will enhance the look of your chair longer. No machine wash
